

Uncontrolled bleeding is the number one cause of preventable death from trauma. The greater the number of people who know how to control bleeding in an injured patient, the greater the chances of surviving that injury.

NCH is leading the way as a Stop The Bleed trainer. This is a hands on 1 hour course taught to any individual who may be called upon to assist with trauma patients while waiting for first responders or EMS to arrive. The course is designed for those who have received little or no medical training.
