RE: Daily COVID-19 Update

Good morning and thanks for reading this update. The Southeast District Health Department issued a press release Friday evening saying that the following new cases of COVID-19 have been discovered in the district:

One in Nemaha County

Two in Otoe County

Two in Richardson County

This is not the time to relax your protection practices when out in public. The virus is very much alive in Nebraska as well as other parts of the nation.

As of 9:00 this morning there were 12,934,317 cases in the world. Yesterday there were 12,740,971 cases. There have been 569,697 deaths. Yesterday there had been 565,716 deaths.

In the United States there are now 3,304,942 positive cases, 135,205 deaths and 40,282,176 people that have been tested. Yesterday there were 3,247,782 cases, 134,815 deaths and 39,553,395 people that had been tested. That makes over 186,000 new cases identified since my last update. Some states are seeing their fastest rate of increase in cases since the pandemic began.

In Nebraska there are now 21,172 cases and there have been 285 deaths. Yesterday there had been 20,998 positive cases and 285 deaths. That makes 174 new confirmed cases identified since yesterday and 70 of the new cases are in Douglas County. 208,103 people have been tested in the state. Yesterday 203,854 people had been tested. We now have had five confirmed cases in Nemaha County, seven in Richardson County, eight in Johnson County and twenty-six in Otoe County. These are the numbers of cases in each county as reported by the Southeast District Health Department. 8,024 of the Nebraska cases are in Douglas County. There have now been 1,620 confirmed cases in Hall County, 877 cases in Dawson County and 1,790 cases in Dakota County. There are now 63 cases in Gage County and 2,114 cases in Lancaster County. There have been 46 positive cases and one death in the Southeast District Health Department area.

Thanks for all you do every day! Remember to be kind!
